Biofeedback and Neurofeedback Applications in Sport Psychology

There are no existing sport psychology/NF/BFB handbooks in print making **this book a unique contribution to each field**. Contributors to the book will include some of the top sport psychology consultants and leaders in peak performance training who also incorporate biofeedback and neurofeedback in their consultation. This book will express the opinions, experience, and descriptions of performance techniques and working models of its authors within sports and across sporting contexts.

Who can benefit from this book?

- **A professional athlete** who desires greater intensity and focus or the effective performing state.
- **A sport psychology consultant, biofeedback or neurofeedback trainer, or therapists** in the field of psychology who desire to gain information and training in a new, exciting, cutting edge application.
- **A coach** who wants to maximize creative decision-making and effectiveness on the field
- **Anyone who competes** and wants more emotional control or balance in their life, as well as a healthier mind and body
